

FinTech Domains, Part 1

Times are changing! Now that you're familiar with some of the technological factors that have led to change in the finance world as a whole, it's time to go deeper into how technology has affected FinTech domains specifically and altered traditional finance activities.

Working in groups of 2 or 3, research the following FinTech domains:

- Payments and Remittances
- Robo Advisors and Personal Finance
- RegTech
- Digital Banking
- InsurTech
- Alternative Finance

Instructions:

- Create a document containing the names and definitions of each FinTech domain.
- Research each domain and use your findings to answer the following questions:
 - What does the particular FinTech domain do? What is its purpose?
 - What is the competitive landscape? Who are its main contenders?
 - What are the main factors for change in the domain? How is the domain being disrupted by innovation?
 - What are the technologies used?
 - What is its past, present, and future growth?

Hint

Try using collaborative tools like Google Docs to work more efficiently with your group members.
