Git Welcome

In this activity, you will modify your README file for your GitHub repository and add visual features using markdown syntax.

Instructions

Complete the following steps:

1. Navigate to your local git repository folder.

2. Modify the README file in the following order:

   - Add an H1 header to the README title.

   - Add an image. (It doesn't need to be FinTech-related.)

   - Add an H2 header for the README description.

   - Add an H3 header for the README table of contents.

   - Add links to each subfolder within the table of contents.

3. Push the changes to the remote git repository.

4. Verify the changes by navigating to the GitHub website.
