Create and Personalize a GitHub Repository

In this activity, you will create a GitHub repository to hold future work assets that can be showcased to potential employers.

Instructions

Complete the following steps.

1. Navigate to GitHub and log in with your credentials.

2. Create a new GitHub repository.

3. Download the ZIP file of the GitHub repository and extract the contents.

4. Modify the intiialized `README.md` file by inserting a quick introduction about yourself:

   - Who are you? What is your background?

   - What are your career goals?

   - Why did you choose FinTech as a career path?

5. Update the `README.md` file in your online GitHub repository.

Hint

To learn more about git and how it's used, use this resource.
